— SKILLS

Concepts	Object-oriented Programming · Software Development Life Cycle · CI/CD
Languages	JavaScript · Java · Python · HTML · CSS
Libraries/ Frameworks	React.js · React Native · Redux · jQuery · Bootstrap · Styled Components · Jest
Databases/ DBMS	Oracle SQL Developer · Microsoft Access
Tools	Git · SVN · Figma · Zeplin · Jira · Confluence

— EXPERIENCE

UBC Department of Psychiatry | PolarUs App, Work-Learn Software Developer

June 2022 - Present

- Develop the **React Native** front-end and **Firebase** back-end of PolarUs, an application for quality of life with bipolar disorder, while maintaining best practices for **accessibility** and optimized user experience.
- Leverage **Git** workflows to resolve **merge conflicts** while collaborating with a team of developers, machine learning engineers, and UX researchers in a **Scrum** environment.

Sendo.vn | Marketplace - Revenue Squad, Frontend Developer Intern

May 2021 - August 2021

- Increased take rate from 2% to 6% and improved user experience on Sendo's e-commerce seller website by translating **Zeplin** designs to code and renovating landing pages of seller ads, a core part of Sendo's revenue stream, using **React.js (HTML/ CSS/ JavaScript)**, **Semantic UI**, and **Sendo's internal UI framework**.
- Effectively handled **REST API** calls to backend servers and fetched Sendo's seller account data using **Redux**.
- Enhanced website insights by implementing **Firebase Analytics** tracking on multiple pages with maintainable, reusable code and self-testing all parameters before handing work to Quality Assurance engineers.
- Went beyond my assigned tasks and took initiative in fixing multiple **user interface bugs** in production as the company's first female developer intern.

FPT Information System | Teller App, Software Developer Intern

June 2020 - October 2020

- Developed the interface of more than 20 bank forms that display, collect, and update users' bank account information using **HTML**, **CSS**, and **Bootstrap**.
- Implemented logical validation of bank forms by writing **JavaScript/ jQuery** functions and retrieving account information from database and backend via **AJAX** requests as well as **SQL** queries.

— PROJECTS

(More projects: github.com/monicachauhuynh)

Bindy | Dating App, Software Developer & Product Designer ([Github](https://github.com))

August 2021 - Present

- Develop a **full-stack web application** with 2 other developers in a **Scrum** environment using **React.js**.
- Ensure the product's functionality and quality of code by implementing **unit testing** using **Jest**.
- Optimize the app's user interface using **Figma** by adhering to best practices and **responsive design** principles.

Curie | OpenAI API Project, Software Developer ([Github](https://github.com) | [Replit](https://replit.com))

May 2022

- Developed a **React.js** application that interacts with **OpenAI's REST API** service through an **API key** that allows users to send prompts to an AI engine, view responses, and revisit their previous prompts in local storage.

— EXTRACURRICULARS

UBC Computer Science Tri-mentoring Program, Senior Developer Mentee

August 2021 - Present

Developh Vietnam, Software Developer Mentee

June 2021 - Present

UBC Me Inc. Conference, Vice President Creative

April 2021 - March 2022

Women in Technology (WiTech), Chapter Marketing Director

September 2020 - December 2020

— EDUCATION

University of British Columbia, Bachelor of Commerce, Vancouver, Canada

Expected Graduation: May 2024

- Combined Major in Business and Computer Science | UBC International Major Entrance Scholarship (2018).
